

ACTION CAMP AND MASS ACTION: PHW ADE! Goodbye PHW!

FOR A SOLIDARITY-BASED AND ECOLOGICAL AGRICULTURAL TURNAROUND

Action camp | 13 – 20 June 2020 | Lower Saxony (Niedersachsen)

15 – 18 June Actions | Workshops | Children's programme | Networking

TOGETHER AGAINST THE ANIMAL INDUSTRY

Climate change is advancing at an alarming rate, the Amazon rainforest is burning continuously and more and more ecosystems are collapsing. The animal industry is a significant contributor to this. Forests are demolished and huge areas are cultivated with industrial monocultures in order to produce animal feed. Liquid manure and dung contaminate ground and surface water, while workers have to slave away in stables, slaughterhouses and meat processing plants under inhumane conditions. Sentient animals are treated as mere commodities. They suffer immensely. In many parts of the world, the animal industry increases the price of staple foods and access to land, leading to hunger.

In the midst of the ecological crisis, agricultural and meat companies are achieving record sales at the expense of humans, animals and the future of us all – this is a scandal!

In June 2020, we will bring the operations of Germany's largest poultry breeder in Rechterfeld (Lower Saxony) to a standstill in a mass action of civil disobedience.

The PHW Group, known for its brands Wiesenhof and Bruzzler, is one of the most important players in the German animal industry.

The 8-day action camp near to the facilities will also be a place to meet new people, network, exchange ideas and receive training in the fight against the animal industry.

The action and camp is being organised by a large alliance from various social movements. It is time for us to come together and combine our collective firepower to bring about a fundamental agricultural turnaround – creatively, diversely and determinedly. Together, we will stop PHW!

With our action, we will demand:

***The abolition of the animal industry
and the closure of all facilities!***

We will demand the expropriation of PHW and the conversion of the business to ecologically sustainable and solidarity-based plant production facilities under the self-administration of the workers. As part of a comprehensive agricultural turnaround, the animal industry needs to be abolished entirely and replaced with agriculture that is neither at the expense of sentient beings nor driven by profit.

Let us resist climate injustice and stand in solidarity with all who are affected by the climate crisis. Let us end the exploitation of workers and violence against animals.

For overcoming the capitalist system!

SYSTEM CHANGE NOT CLIMATE CHANGE!

At the camp, there will be a comprehensive programme of presentations, workshops and discussions.
